

Ophir Gold Corp. Commences Trading in the USA on the OTCQB® Venture Market

Vancouver, BC, Canada, April 6, 2021 – Ophir Gold Corp. ("Ophir" or the "Company") (TSX.V: OPHR) (FSE: 80M) (US: KPZIF) is pleased to announce that it has received approval from OTC Markets Group Inc. to begin trading on the OTCQB® Venture Market (the "OTCQB") under the ticker symbol "KPZIF" effective today at the open of markets. The common shares of Ophir will continue to be listed on the TSX Venture Exchange under the ticker symbol "OPHR", as well as on the Frankfurt Stock Exchange under the ticker symbol "80M".

"Ophir is excited to be listing on the OTCQB Venture Market. We believe a US listing will provide the company with increased access and exposure to U.S. institutional and retail investors and a broader shareholder base, ahead of the Company's upcoming maiden drill program at the Breccia Gold Project in Idaho," comments Shawn Westcott, Chief Executive Officer of Ophir.

The OTCQB offers early-stage and developing Canadian companies the benefits of being publicly traded in the U.S. with lower cost and complexity than a U.S. exchange listing. Streamlined market standards enable Canadian companies to provide a strong baseline of transparency to inform and engage U.S. investors. To be eligible, Canadian companies must be current in their SEDAR reporting and undergo an annual verification and management certification process.

Nauth LPC acted as the Company's OTC Markets Sponsor in connection with the listing of the Company's common shares on the OTCQB.

About the Company

The Company is a fully financed gold exploration company focused on the exploration and development of its flagship property, the past producing Breccia Gold Property located in Lemhi County, Idaho. The Company has an option to earn a 100% interest in the property over a three-year period from Canarc Resource Corp. and DG Resource Management.

About the Breccia Gold Property

The Breccia Gold Property consists of 98 claims covering approximately 1,973 acres (~798.4 ha) within the Blackbird Mining District, in Lemhi County, approximately 40 kilometres southwest of Salmon, Idaho. The Property is accessible by paved highway and a network of well-maintained gravel roads and is host to the historical Gahsmith Gold Mine. Exploration and development activity on the Property dates back to the 1930's and has been exploited by at least eight adits, with several thousand tons of mineralized material extracted. The Breccia Gold Property now covers both the Meadows Fault Zone and the parallel Musgrove Mine Trend. Recent exploration carried out in 2018 and 2019 has included the re-mapping and sampling of the Meadows Fault Zone and the results are suggestive of the existence of a significant low-sulfidation, epithermal gold system.

Cautionary Note

The information contained herein contains "forward-looking statements" within the meaning of applicable securities legislation. Forward-looking statements relate to information that is based on assumptions of management, forecasts of future results, and estimates of amounts not yet determinable. Any statements that express predictions, expectations, beliefs, plans, projections, objectives, assumptions or future events or performance are not statements of historical fact and may be "forward-looking statements." Forward-looking statements are subject to a variety of risks and uncertainties which could cause actual events or results to differ from those reflected in the forward-looking statements, including, without limitation: risk related to the failure to obtain adequate financing on a timely basis and on acceptable terms; risks related to the outcome of legal proceedings; political and regulatory risks associated with mining and exploration; risks related to the maintenance of stock exchange listings; risks related to environmental regulation and liability; the potential for delays in exploration or development activities or the completion of feasibility studies; the uncertainty of profitability; risks and uncertainties relating to the interpretation of drill results, the geology, grade and continuity of mineral deposits; risks related to the inherent uncertainty of production and cost estimates and the potential for unexpected costs and expenses; results of prefeasibility and feasibility studies, and the possibility that future exploration, development or mining results will not be consistent with the Company's expectations; risks related to commodity price fluctuations; and other risks and uncertainties related to the Company's prospects, properties and business detailed elsewhere in the Company's disclosure record. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements. Investors are cautioned against attributing undue certainty to forward-looking statements. These forward-looking statements are made as of the date hereof and the Company does not assume any obligation to update or revise them to reflect new events or circumstances, except in accordance with applicable securities laws. Actual events or results could differ materially from the Company's expectations or projections.
